

we're hosting SteelDay!  
September 24, 2010

## You're Invited to: **B&B WELDING COMPANY, INC.**

Attendees will tour a modern 35,000 square foot fabrication shop with advanced CNC machinery and can also witness demonstrations of interoperability between engineering, detailing, estimating, production control and bar coding softwares including: RAM Steel, SDS/2, Fabsuite and P2 Systems, Infosight Corporation, Shop Data, and Peddinghaus equipment. Attendees will learn about the processes steel fabricators go through from receiving the steel through to shipping steel to the job site. Demonstrations of bolt tensioning/calibration techniques using Skidmore Wilhelm Calibrator will be on going. Participants are encouraged to ask questions throughout.

<b>Safety Gear:</b>	Long pants and closed toe shoes required for facility tours. Safety glasses will be provided.	<b>Of Interest to:</b>	Architects, Engineer, Contractors, Students, Developers – all welcome!

### About B&B Welding Company :

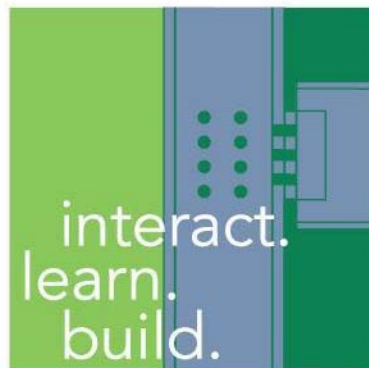

B&B Welding Company is a 39 year old firm that has migrated from a portable welding shop to the Baltimore/Washington area's most technologically advanced steel fabricator. We took the hardest working people in the steel business and made them smarter. We gave them big, powerful machines, a written quality control program, add on AISC membership and the ability to electronically import designs straight from the engineers and what you get is one of the most technology-driven steel fabrication shops in the region. From small jobs to 500-ton jobs, B&B will complete them swifter, more affordably and with better quality.
